Small farms or big?

Zokufa believes the better course would be toward the ___1___ of small-scale farms and ___2___ them to let animals roam free. He says this is better for the animals and the environment, and provides more jobs as well.

But a recent report by the U.N. Food and Agriculture ___3___ says there is no viable ___4___ to intensive livestock operations for feeding growing urban populations. Those farms ___5___ produce more

with fewer resources.

___6___ does not have to be a bad thing, says the FAO's Daniela Battagila.

"You [do] not necessarily have to choose between food ___7___ and taking care of the animals," she says. "The two things can go hand in hand. Or even better, one can contribute to the other."

FAO is promoting simple, low-cost techniques, such as more ___8___ livestock handling and slaughtering procedures.

That could mean not only better conditions for the animals, but a better quality and more abundant supply of meat for the ___9___ number of developing-world ___10___ who are demanding it.
