## Introduction

Once upon a time there was a child who did not believe in Christmas, he thought that everything of the presents, Santa Claus, wise men,... It was a foolishness for children boys. But one year all that changed.

# THE MYSTERY OF CHRISTMAS

It was good night, everyone was reunited with his family except a child called Angel. He was just sitting by his window room, suddenly his sister came in and told him that he had to tell her something very important, so he let her in.

Then she told him (I'm going to show you that the wise men and Santa Claus exist) her amazed answered him (how are you going to do that?) and she told him again (very simple we will stay all night to wait for them) his brother agreed simply to show him that everything did not exist.

When their parents went to bed they go up from the bed and stood behind the sofa recording all the strange things that could be heard and moved around the house. After two hours nobody had yet appeared there, so they began to hear noises and footsteps on the roof, the children went out to the playground and saw a Santa Claus.

The sister started screaming: Santa Claus down here. Santa Claus was scared and hid behind the fireplace then she said: Do not

be afraid. I just want you to prove to my brother that Christmas exist. Santa Claus came out and told him as if to prove that Christmas exists? and she said: If he does not believe in Christmas. He took the two brothers and put them on the sled. He told them that if they wanted to take a return on it, the two of them answered yes he took them for a walk, while telling him many stories about Christmas. So it began to dawn and he took them back home, so the boy told him that there was discovered the real Christmas.
